EXPERIENCE //

LEAD FULL STACK DEVELOPER // SEPTEMBER 2017 – PRESENT DON JAGODA ASSOCIATES, INC. – MELVILLE, NEW YORK

Lead developer in an agency specializing in creating sweepstakes, contests, games, and APIs.

- Create dozens of sites, APIs, and custom solutions, catering to various client's marketing campaigns using continuous deployment
- Interview and hire new talent, code review, mentor, and train other developers
- Establish formal procedures for definition of development timelines and scope from the sales prospect stage to final itemized contracts
- Identify and execute cost savings in technical infrastructure and development
- Decide and document standard coding procedures, styles, and best practices for developers to have cohesive and maintainable projects that any developer can pick up and build upon even if they were not originally involved

FULL STACK DEVELOPER // FEBRUARY 2014 – AUGUST 2017 HEDGEHOG DEVELOPMENT LLC. – HOLBROOK, NEW YORK

Full stack web developer in a full-service interactive agency dedicated to designing and building websites including e-commerce and content management systems.

- Collaborate with clients and project managers to create specifications and estimates for site functionality that meets client needs
- Develop said functionality, writing code that is maintainable, extensible, and modular for future development
- Use version control systems such as GIT and SVN during development for deployment, easy roll backs, and update tracking
- Maintain and update existing sites which may have been developed internally or by other parties
- Administer Linux web servers' Apache, PHP, and MySQL configuration to meet client site requirements
